To whom it may concern.

I am an Application Security Especialist, and currently work as a CyberSecurity Coordinator at Nova8 Cyber Security in Brazil.

At Nova8, I have 2 years of experience in the area of Application Security, more specifically, in SAST, DAST, SCA and IAST. I am responsible for the Pre Sales Area, Technician and Support, in which my job consists of monitoring, delegating and coordinating actions to find the root cause and define a solution to the problems claimed. At the same time I am also responsible for the coordination of projects related to Sales, besides being a representative for project management of Checkmarx SAST Projctcs in Brazil.

This position has helped me to improve my technical knowledge of our portfolio, to improve my leadership skills and my analytical evaluation skills in order to help in the definition of a solution for the discussed issues. It has also helped me to improve my skills in conflict management during discussions in involved groups. In parallel, in an effort to involve myself more with the data revolution trends, I have also supported the development of a dashboard for my team in ELK.

Currently, I also conduct seminars and lectures on the topic of Application Security, Development of modern applications and implementation of security on CI/CD pipelines in order to bring the knowledge I have to as many people as possible.

I also have a Podcast together with 3 more Brazilian friends to spread the DevSecOps culture whose name is called "DevSecOps Podcast" the content is in PT-BR but we are starting to invite international guests where the content will be broadcast in English too.

I believe my previous experiences have prepared me to occupy this position of project leader. I am eager to learn and improve myself and this challenge would be a great opportunity for the growth of my career.

Kind regards,

Marcos Santos
